

Project Design Phase

Proposed Solution Template

Date	12 July 2026
Team ID	Buyya Vaishnavi
Project Name	ShopEZ
Maximum Marks	2 Marks

Proposed Solution Template: Project team shall fill the following information in the proposed solution template.

S.No	Parameter	Description
1.	Problem Statement (Problem to be solved)	Customers struggle to discover trustworthy sellers and purchase products conveniently in one place. Sellers require a systematic way to list products and manage orders, and administrators need an application to monitor users, products and orders.
2.	Idea / Solution description	ShopEZ is a MERN stack e-commerce website that allows customers to search for products by category, add them to a cart, checkout and track order status, while sellers and administrators monitor marketplace activity using dedicated dashboards.
3.	Novelty / Uniqueness	The platform integrates Customer, Seller, and Admin modules in a single system with product listing, cart and checkout, order status tracking, and role-based dashboards for efficient marketplace management.
4.	Social Impact / Customer Satisfaction	The solution improves access to a wider range of products, reduces the time needed to compare and purchase items, increases customer convenience, and provides a transparent system for tracking orders.
5.	Business Model (Revenue Model)	Revenue can be generated through seller commission on sales, featured product listings, seller subscription plans, and advertising partnerships.
6.	Scalability of the Solution	The system can be expanded to support multiple product categories, multi-vendor analytics, payment gateway integration, mobile applications, and large-scale seller networks.

Summary

The proposed ShopEZ solution brings customers, sellers, and administrators together on a single, secure MERN stack platform. By focusing first on the core shopping journey - registration, product discovery, cart, checkout, and order tracking - the solution addresses the most pressing problems identified during the ideation phase while leaving room to scale toward payments, reviews, and multi-vendor analytics in future releases.
