Customer Problem Statement Template:

The Customer Problem Statement template has been used to highlight and analyze various problems experienced by different users of ShopEZ. PS-1: In PS-1, a customer looking for an easy and effective way to shop for products online was identified. The customer would like to browse a wide range of products from different sellers and complete a purchase in the simplest way possible, without visiting multiple websites. The existing process is cumbersome since customers have to search across scattered platforms and compare products manually. PS-2: In PS-2, a small business owner (seller) managing product listings and orders was identified. The seller requires an effective means of listing products and tracking orders to avoid confusion and grow their business.

Problem Statement 1

I am a customer who wants to shop for a wide range of products online. I'm trying to find trustworthy sellers and complete my purchase quickly, but comparing products across scattered platforms and tracking orders is inconvenient. Because there is no single reliable marketplace, I feel frustrated and hesitant to shop online.

Problem Statement 2

I am a small business owner (seller) who wants to sell products online. I'm trying to reach more customers and manage my orders efficiently, but listing products, tracking inventory, and managing order status manually is time-consuming. Because there is no centralized seller dashboard, I feel overwhelmed and unable to scale my business.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A customer looking for products to purchase online.	Find quality products from trustworthy sellers quickly.	The product discovery and checkout process is often scattered and slow.	There is no single reliable marketplace bringing multiple sellers together.	Frustrated and hesitant to shop online.
PS-2	A seller managing product listings and customer orders.	Reach more customers and manage my orders efficiently.	Manually listing products and tracking orders can cause confusion and lost sales.	There is no centralized seller dashboard to manage the business.	Overwhelmed and unable to scale my business.
